PARAFFIN SECTION MOUNTING BATHS
MH8515, MH8515Bx1, MH8515x6

INSTRUCTION BOOK
Please take your time to read this Instruction book in order to understand the safe and correct use of your new Thermo Fisher product.

It is recommended the Responsible Body for use of this equipment reads this Instruction book and ensures the user(s) are suitably trained in its operation.

1. INTRODUCTION.

The MH9515 Paraffin bath is designed for use as a heated, distilled water floating bath for the manipulation and location of paraffin wax sections onto glass slides.

The MH8515 has a temperature controller which maintains the bath at the required temperature, and a built in safety device which shuts off the energy supply.

With an PTFE black interior, stove enamaled black / white alluminium exterior and durable black metal lid the Electrothermal wax despenser is vertually maintainance free and extremly easy to clean.
2. SYMBOLS AND USING THIS INSTRUCTION BOOK

2.1. Throughout this Instruction book the following symbols are shown to identify conditions which pose a hazard to the user, or to identify actions that should be observed. These symbols are also shown on the product, or its packaging. When a symbol is shown next to a paragraph or statement it is recommended the user takes particular note of that instruction in order to prevent damage to the equipment or to prevent injury to one’s self or other people.

To prevent injury or equipment damage it is the manufacturer’s recommendation that all persons using this equipment are suitably trained before use.

2.2. Symbols defined.

- Caution, risk of danger. See note or adjacent symbol.
- Protective conductor terminal to be earthed. *(Do not loosen or disconnect).*
- Caution / risk of electric shock
- Recyclable Packing Material
- Do not dispose of product in normal domestic waste.
- Caution. Hot surface.
- Refer to Instruction book
- This symbol adjacent to an indication lamp means mains power Off/On when lamp non-illuminated / illuminated
- This symbol is used to identify the Bath Heater on Control and bath heater “ON” indicator.
- This symbol is used to identify the Bath Heater Over-temperature indicator.
3. SAFETY INFORMATION.

This product has been designed for safe operation when used as detailed in accordance with the Manufacturer’s instructions.

**NOTE:** Failure to use this equipment in accordance with the manufacturer’s instructions may compromise your basic safety protection afforded by the equipment and may invalidate the warranty / guarantee. The warranty / guarantee does not cover damaged caused by faulty installation or misuse of the equipment.

3.1. Prevention of Fire and Electric Shock.

- To prevent a risk of fire or electric shock, **DO NOT** open your product case without authorisation. Only qualified Service personnel should attempt to repair this product.
- Replace fuses only with the type as listed in section, ‘Technical Specifications and Parts and Accessories’ (See fuse type and rating).
- Ensure the Mains Power Supply conforms to rating found on the data plate located on the back of this product.
- **Never** Operate this equipment without connection to earth / ground.
- Ensure the mains supply voltage is correctly earthed / grounded in accordance with current area legislation.

3.2. General Safe Operating Practice.

- Always follow good laboratory practice when using this equipment. Give due recognition to your company’s safety and legislative health & safety procedures and all associated legislation applicable to your areas of operation.
- Only use this equipment for the purpose intended.
- Ensure equipment is used on a clean, dry, non-combustible, solid work surface with at least 300mm suitable clearance all around from other equipment.
- **Do not** position the product so that it is difficult to disconnect from the mains supply.
- **Do not** lean or stretch over equipment without the lid in place.
- **Do not** immerse unit in water or fluids.
- **Do not** spill chemicals over this product. If spillage does occur, disconnect unit from mains supply and follow instructions as detailed in Maintenance. (Section 9).
- **Do not** cover this equipment whilst in use.
- **Do not** leave equipment switched on when empty.
- It is not recommended to leave any heating apparatus unattended during operation.
- Only use Original Equipment ‘Manufacturer’s Spares and Accessories’. Ref Section 11.
- The equipment is not spark, flame or explosion proof and has not been designed for use in hazardous areas in terms of BSEN 60079-14:1997. Keep flammable, low flash point substances away from the apparatus.
Do not operate or handle any part of the product with wet hands.

Keep the Mains cord away from the heated tap area. (See hot Zone Illustration, paragraph 2.2).

For the higher settings of the tap heater, the external surfaces of the tap may exceed 70°C. therefore avoid contact with the surface area of the tap. (See hot Zone Illustration, paragraph 2.2).

Do not use the tap heater control at maximum (fully clockwise) setting as prolonged use at maximum setting will damage the tap insulation cover.

Do not apply external heat to the tap.

Do not move this equipment when the wax content is in a hot molten state.

The Responsible Body should refer to the Material Safety Data Sheet for the paraffin wax material being used in order to be aware of and take due measures in accordance with the stated information.
4. UNPACKING AND CONTENTS

4.1. Please check the contents of your carton against the diagram.

5. **INSTALLATION.**

5.1. **Electrical safety and installation.**

5.1.1. This equipment is designed for safe use under the following conditions:

- Indoor use.
- Altitude up to 2000 meters.
- Temperatures between 5°C and 40°C.
- Maximum relative humidity 80% for temperatures up to 31°C decreasing linearly to 50% relative humidity at 40°C.
- Mains supply voltage fluctuations up to ±10% of the nominal voltage.
- Transient overvoltages typically present on the mains supply.
- Applicable rated pollution degree 2.

5.2. This equipment must be earthed / grounded to a fixed earth / grounded mains socket outlet. The mains supply is to earthed / grounded in accordance with current legislation.

5.3. Ensure only the correct rated mains input fuses are fitted. (Where applicable ensure the correct Mains cord and moulded IEC plug and lead set fuse if fitted). See Technical Specification Section 8 of this Instructions book.

5.4. Check the voltage on the product data label on this product unit and those of any accompanying electrical accessory. Ensure the rating conforms to your local supply.

5.5. It is recommended this product be connected to a mains supply source which incorporates an RCD or GFCI device.

5.6. Do not install this product or accessories on a surface which may become wet.

5.7. The unit is supplied with a Mains cord wired as follows:

- Green / Yellow or Green = Earth / Ground
- Blue or White = Neutral
- Brown or Black = Live / line hot.
6. ENVIRONMENTAL PROTECTION.

6.1. Electrothermal has given due consideration to environmental issues within the design and manufacturing process without compromising end product performance and value.

6.2. Packaging materials have been selected such that they may be sorted for recycling.

6.3. At the end of your product and accessories life, it must not be discarded as domestic waste. Ref: EU Directive 2002/96/EC on Waste Electrical and Electronic Equipment Directive (WEEE). Please contact your distributor / supplier for further information. For end users outside of the EU consult applicable regulations.

6.4. This product should only be dismantled for recycling by an authorised recycling company.

⚠️ This product and accessories must be accompanied by a completed Decontamination Certificate prior to any disposal. Copies of the Certificate are available from your distributor of Electrothermal products, or you may copy and enlarge from ‘Appendix A’ of the instruction book.

Electrothermal is registered as Electrothermal Engineering Limited with the Environment Agency as a producer of WEEE through an authorised compliance scheme.
7. **PRODUCT OPERATION.**

7.1. The Paraffin Bath has been designed for easy operation. The illustration below shows a detailed layout of the product.

![Diagram of the Paraffin Bath]

1. Mains power on neon
2. Heater on neon.
3. Lid
4. Read instruction Label
5. On Off mains power switch
6. Over temperature warning neon.
7. Temperature adjustment thermostat
8. Earth point Label.
9. Mains cord with plug.
10. Earth bonding test point.
11. Data plate label.

7.2. With the unit disconnected from the mains electricity supply, remove the lid and **half fill** the bath with distilled water.

7.3. Replace the lid to prevent contamination and evaporation.

7.4. Plug the unit into the mains electrical supply. Turn the unit on by the mains I/O switch and observe white power on neon is illuminated (I – setting).

7.5. Set the unit heater control to the maximum setting. The objective is to set the shortest warm up time. When the heater is cuts in and turns on, the amber neon will illuminate. This indicates when the heater is on.

**Note:** The thermostat scale is calibrated in °C.

7.6. When the distilled water has reached the required temperature, reduce the heating temperature and allow it to stabilise. Add further distilled water if required.
7.7. If an over temperature condition occurs, the red ‘Over temperature’ indicator will illuminate and the heater control for the bath will turn off. Disconnect from the mains electricity supply and check there is sufficient distilled water in the bath. If a lack of distilled water isn’t the reason for the over temperature fault condition, refer to section 10 Customer support.

*Take care not to get hot distilled water onto hands /skin*

7.8. Regularly check the volume of distilled water present in the unit. Replenish as required.
8. TECHNICAL SPECIFICATION.

Mains Power Supply Voltage: MH8515B and MH8515x6 230V – AC 50/60 Hz or MH8523Bx1 115V – AC 50/60 Hz as stated on the data plate label.

Maximum Power Consumption: 240 Watt max at 230V

Max operating ambient temperature: 40°C

Mains lead plug Fuse rating (UK –only): 3A BS1362

Mains Power Cord (UK): 3 core earthed / ground. 2 meters long. Lead set – supply cord H05 V V-F with rewireable BS1363 plug. Replace only with equivalent cable.

Mains Power Cord and Moulded Plug set (USA - with plug): 3 core earthed / ground. 2 meters long. Moulded plug – supply cord SJT V W - 105°C. Replace only with equivalent cable.

Mains Power Cord and Moulded Plug set (Europe – with Schuko plug): 3 core earthed / ground. 2 meters long. Schuko plug – supply cord H05 V V-F. Replace only with equivalent cable.

Product Fuse Rating: 230V – F1.25A (IEC127) Quick Blow Fuse 20mm x 5mm Glass. 115V – F5A (IEC127) Quick Blow Fuse 20mm x 5mm Glass.

Over Temperature Protection: Over temperature protection from 105°C non-resettable thermal fuse.

Bath Capacity: 2.25 litres (1/2 gallon).

Neon indicators: Power on – clear Tap heater – Amber Bath over temperature – Red

Controls: Power On: 2 position toggle switch labelled ‘O / I’

Bath Heater: Rotary control labelled with graded temperature scale.

The Ingress protection rating for this product is classified as IPX 1.

8.2. Dimensions and Weight. (unpacked and empty)
9. MAINTENANCE

9.1. General Information.

⚠️⚠️ Unplug the unit from the mains voltage supply and allow it to cool before undertaking any maintenance tasks.

⚠️ Maintenance should only be carried out under the direction of the Responsible Body, by a competent electrician. Failure to do so may result in damage to the product and in extreme cases be a danger to the end user.

With proper care in operation this equipment has been designed to give many years of reliable service. Contamination or general misuse will reduce the effective life of this product and may cause a hazard.

Maintenance for the unit should include:

- Periodic electrical safety testing (an annual test is recommended as the minimum requirement).
- Regular inspection for damage with particular attention to the mains lead and plug and the tap and heater insulation.
- Routine cleaning of the equipment should be undertaken using a clean cloth. Hot water may be used to remove any solidified wax. Allow the equipment to dry thoroughly before reconnecting to the mains electricity supply.

DO NOT USE SOLVENTS FOR CLEANING ANY PART OF THIS EQUIPMENT.

9.2. Internal Fuse Replacement.

9.2.1. Ensure the unit is switch off and unplugged from the mains electricity supply.

9.2.2. Ensure the unit has been completely emptied of wax.

9.2.3. Turn the unit up side down and undo the large M12 nut located in the centre of the base.

9.2.4. Lift off the base cover.
9.2.5. The fuse holder is now accessible. Replace with the correct type of fuse (see section 8)

9.2.6. Replace the base cover.

9.2.7. Refit the M12 nut back into position and secure tightly.

9.3. **Prior to further use, the Responsible Body shall check the electrical safety of the unit**

9.4. The control thermostat knob may be reset by the responsible body. Slacken the grub screw and re-tighten into a new position.

9.5. Spillage and Decontamination.

In the event of spillage switch off and unplug this product from the mains electrical supply. Wipe off all excess liquid from the reaction block and surrounding area using an absorbent soft cloth. Allow sufficient time for any ingressed liquid to evaporate before commencing with use.

If in doubt please consult Customer Support. Refer to section 10.

**Biohazard** If the equipment has been exposed to contamination, the Responsible Body is responsible for carrying out appropriate decontamination. If hazardous material has been spilt on or inside the equipment, decontamination should only be undertaken under the control of the Responsible Body with due recognition of possible hazards. Before using any cleaning or decontamination method, the Responsible Body should check with the manufacturer the proposed method will not damage the equipment.

Prior to further use, the Responsible Body shall check the electrical safety of the unit. Only if all safety requirements are met can the unit be used again. The above procedure is intended as a guide. Should spillage occur with a toxic or hazardous fluid then special precautions may be necessary.

**Decontamination Certificate.**

**Note:** In the event of this equipment or any part of the unit becoming damaged, or requiring service, the item(s) should be returned to the manufacturer for repair accompanied by a decontamination certificate. Copies of the Certificate are available from Distributor/Manufacturer. Appendix A of this instructions book may be copied and enlarged.

At the end of life, this product must be accompanied by a Decontamination Certificate. See section 6.3 and 6.4.
10. CUSTOMER SUPPORT

For help and support in using this product, please contact Electrothermal at the following address.
